automotive, such as TPMS (Tire Pressure Monitoring System). The crystal unit is ideally suited for the clock signal generating source of the transmission unit in a tire wheel that is subject to strong centrifugal force.

- •Stable frequency characteristics even with a powerful centrifugal force of 2,000 G, as found in the transmission side of TPMS applications.
- •Excellent environmental performance including heat, vibration, shock and heat cycle resistance.
- •Lead-free. Meets the requirements for re-flow profiling using lead-free solder.
- •Conforms to AEC-Q200.
