- 8.4 Reliability assurance Item
- 8.5 Recommendation reflow profile

: EXH11B-00317

: EXS30B-00249

: EXS30B-00344

Conforms to AEC-Q200

#### 9. Notice

- 9.1 Order items are manufactured according to specification. As to conditions, which are not indicated in this specification and unpredictable such as applied condition and oscillation margin, please check them beforehand.
- 9.2 Unless we receive request for modification within 3 weeks from the issue date of this NDK specification sheet, we will supply products according to this specification. Also, if you'd like to modify specification of order, which has been placed with delivery request within 3 weeks from the issue data of this specification sheet, we would like to discuss with you separately.
- 9.3 In no event shall the company be liable for any product failure resulting from an inappropriate handling or operation of the product beyond the scope of its guarantee.
- 9.4 Where any change to the process condition is made due to the change(s) in the production line, inform personnel of the specifications.
- 9.5 Should this specification data give rise to any disputes relating to any intellectual property rights or any other rights of a third person, the company shall not indemnify anyone for any damage. Their disclosure must not be construed as the grant of a license to use any of the intellectual property rights owned by the company.
- 9.6 If you intend to use products listed on this specification for applications that may result in loss of life or assets (controls relating to safety, medical equipment, aeronautical equipment, space equipment, etc.), please do not fail to advise us of your intention beforehand.
- 9.7 In the company's production process whatever amount of ozone depleting substances (ODS) as specified in the Montreal protocol is not used.
- 9.8 Information contained in this specification must not be quoted, reproduced or used for other purposes including processing either in part or in full without obtaining prior approval from the company.
- 10. Prohibited items

Be sure to use the product under the following conditions. Otherwise, the characteristics deterioration or destruction of the product may result.

(1) Reflow soldering heat resistance

Peak temperature: 265°C, 10 sec

Heating: 230°C or higher, 40 sec

Preheating: 150°C to 180°C, 120 sec

Reflow passage times: twice

(2) Manual soldering heat resistance Pressing a soldering iron of 400°C on the terminal electrode for four seconds (twice).

Form M-1

### NOTE

### 1. Frequency Code

Marking Frequency is consist of five digits, first five digits of Nominal Frequency

### Example

| Nominal Frequency | 28.636363 MHz |  |  |  |
|-------------------|---------------|--|--|--|
| Frequency Code    | 28.636        |  |  |  |

### 2. Month Code Table

| Month      | 1    | 2    | 3    | 4    | 5    | 6    | 7    | 8    | 9    | 10   | 11   | 12   |
|------------|------|------|------|------|------|------|------|------|------|------|------|------|
|            | Jan. | Feb. | Mar. | Apr. | May. | Jun. | Jul. | Aug. | Sep. | Oct. | Nov. | Dec. |
| Month Code | 1    | 2    | 3    | 4    | 5    | 6    | 7    | 8    | 9    | х    | Y    | z    |

\*Marking digits are not include a decimal point and dot mark.

## **Reliability assurance item**

\*1. High Temperature Storage and Temperature Cycling In case of customer spec on High temperature exceed +85°C, Low temperature exceed -40°C, above test according to customer spec high or low temperature will be perform and guarantee.
